POPULATION AND DWELLINGS IN LOCALITIES—TASMANIA

CENSUS 30TH JUNE, 1961

NOTE.—In the Rural Areas clearly defined boundaries of towns and other localities are not often available, and the figures shown below have been derived from Census schedules relating to the dwellings which were stated to be within the generally accepted limits of the town or district specified. Wherever the requisite information was available from Census Collectors or from Census maps, details of towns were compiled separately, but in the absence of information necessary to separate the town from the surrounding district, the whole area has been regarded as one locality, which may therefore cover a very wide area, especially in the less densely settled areas of the State. Dwellings located beyond the limits of a town for which details were separately recorded, and which were in an area which had no other recognised name, were recorded as "near" the appropriate town.

(*a*) Causes of death for ages stated in weeks and months are shown on page 19.
(*b*) The classification used for Class XVII is that according to external cause (the E code).

DEATHS FROM MALIGNANT NEOPLASMS (ALL FORMS), COMPARED WITH DEATHS FROM ALL CAUSES

NOTE.—Owing to changes in classification and in the methods of determining a single cause of death in cases where multiple causes are shown on the death certificate, the figures in the following table are not strictly comparable throughout the whole period. However, the figures from 1950 onwards are on a comparable basis.

AUSTRALIAN FEMALE LIVES, 1953 to 1955: ELEMENTARY VALUES

l_x = Number surviving at each age out of 100,000 born
d_x = Number dying in each year of age out of 100,000 born
p_x = Probability of surviving one year at each age
q_x = Probability of dying within one year at each age
μ_x = Force of mortality at each age
$\mathring{e}_x$ = Complete expectation of life at each age

1. TRADE

SCOPE AND DEFINITIONS

Scope: The statistics included in this volume relate to goods imported and exported by sea and air as part of Tasmania's trade with other Australian States and oversea countries.

Source of Data: Statistics of oversea trade are based on documents required by the Department of Customs and Excise under the Customs Act. Statistics of interstate trade by sea are compiled from trade warrants required under the authority of the Marine Act 1921. Statistics of interstate trade by air are compiled from returns furnished direct to the Tasmanian Office of the Commonwealth Bureau of Census and Statistics by all those who use this medium for the transportation of goods.

Country of Origin and Destination: The countries shown are those from and to which *direct* shipments are made. Goods shown as imported from the other Australian States include those goods imported from oversea and transhipped to Tasmania; and similarly exports to other Australian States include goods exported for transhipment oversea.

Values: All values in this bulletin are expressed in terms of £ Australian. Basis of value for oversea imports is "transaction value, actual (f.o.b.)" or "domestic value (f.o.b.)" if higher. Oversea exports are valued at the Australian f.o.b. port of shipment equivalent of—(i) for goods sold before export, the price at which the goods were sold, or (ii) for goods shipped on consignment, the current price offering for similar goods of Australian origin in the principal markets of the country to which the goods were despatched. Interstate imports and exports are valued f.o.b. at port of shipment.

Quantities: Where quantities are shown, they are expressed, as far as possible, in terms of normal trade units. Quantities are not quoted in respect of those commodities for which there is no appropriate unit of quantity, e.g., Clothing, Fancy Goods, &c.

Tourist, &c. Motor Vehicles: Import and export details of motor cars and commercial vehicles include tourist, &c. vehicles entering and leaving the State. The inauguration of the vehicular ferry service by the "Princess of Tasmania" in October, 1959 resulted in a sharp increase in the transport of the latter type of vehicles. In 1961–62 approximately £7,000,000 of both import and export values derives from the movement of tourist vehicles.

Outside Packages: The value of containers, crates, &c., in which goods are ordinarily imported from oversea is omitted from all import tables. In 1961–62 these outside packages were valued at £229,850. For oversea exports, however, the value recorded for each item includes the value of the outside package.

General: For some individual articles of interstate imports, the quantities and values set opposite them are not complete, because the absence of itemised details necessitates their inclusion under general headings, e.g., some tea, coffee and other packaged goods would be included under "Groceries (Unspecified)"; similarly individual items of apparel and attire would be included under "Drapery (Unspecified)".

Classification of Imports and Exports: The tables of imports and exports in this Bulletin have been compiled according to a statistical classification divided into 21 classes, which came into operation on 1st July, 1945.

Tasmanian Ports: The names of ports in subsequent tables refer to the towns in which the controlling marine boards are located. Thus "Hobart" includes Port Huon; "Launceston" includes Bell Bay, &c.

(*a*) The figures given for each port do *not* take into account coastal movement of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the *last* port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport and Launceston and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port, see page 36.

VESSELS ON TASMANIAN REGISTERS

NOTE.—The Merchant Shipping Act does not make it necessary to register vessels under 15 tons burden if engaged in river or coastal trade. Larger vessels are also exempt from registration if not engaged in trade. Yachts and small trading vessels may be registered at the request of the owners.

CARGO DISCHARGED AND SHIPPED

NOTE.—Cargo is recorded either in units of weight ("ton weight") or in units of volume ("ton measurement" equal to 40 cu. ft.). As totals derived from conversion to a common weight, or alternatively, to a common volume, would not be accurate, entries in each of the two units are recorded and published separately.

RURAL INDUSTRY STATISTICS

(I) SOURCES OF INFORMATION

The statistics are, in the main, compiled from census returns of agricultural, pastoral and dairying production collected from some 11,000 rural holdings in Tasmania at 31st March each year. In conjunction with the general census, supplementary collections from farms are conducted where the harvesting of certain crops has not been completed by 31st March (e.g. apples, potatoes).

Additional information is also obtained from a number of entirely separate collections covering such data as slaughterings, meat production and dairy production and from various outside authorities.

(II) PERIOD COVERED

Data relating to area sown, production, yield per acre and number of holdings growing crops are, in general, for the season ended 31st March. In cases where harvesting has not been completed by 31st March (e.g. potatoes) total production is nevertheless included.

Livestock numbers are reported as at 31st March but production of livestock products have, in general, been shown for the twelve months ended 30th June.

A seasonal calendar showing approximate dates of planting and harvesting, shearing, lambing and slaughtering for export appears on page fifty-three of this Bulletin.

Farm machinery on rural holdings is reported as at 31st March.

(III) DEFINITIONS AND EXPLANATORY NOTES

RURAL HOLDINGS—A "rural holding" is defined for the purpose of these statistics as a picee of land of one acre or more in extent, used for the production of agricultural products or for the raising of livestock and the production of livestock products. In cases where land owners or occupiers possess or work more than one holding, separate returns are required for each except where the holdings are in close proximity and are worked as one, in which case one return only is submitted covering the two or more holdings concerned.

AREA OF CROPS—Total area of land sown or planted to crops shown irrespective of whether the whole area was subsequently harvested or whether a portion or the whole of the crop failed and was not harvested.

Where two successive crops are grown on the same land during the one season, the land is included twice in area of crops. Where two crops are grown together, however, the area is counted once only and is divided between the different crops according to the proportion of each crop grown. No data on the area planted to individual varieties of orchard fruits are collected but estimates are included in this Bulletin based on the reported total acreage and number of trees of each variety planted.

YIELD PER ACRE—Statistics published in this Bulletin relate to yield per acre sown or planted. Data as to acreages of crops harvested are not collected and consequently particulars of yield per acre harvested are not available. In the case of fruit and hops the yields shown are per acre of bearing crops.

PERSONS WORKING ON HOLDINGS—Details are collected on the general farm census of persons working on rural holdings at 31st March. Persons working permanently full-time include all other than casual or seasonal workers and females engaged principally in domestic duties, children attending schools and other persons working only part-time. Casual or seasonal workers including contractors for shearing, fencing, &c. are shown as temporary employees.

Attention is drawn to the difficulty encountered in obtaining data on persons employed on a comparable basis from year to year. The difficulty applies mainly to females and arises because of the tendency of many farmers to include part-time family helpers as full-time workers in their returns.

CLASSIFICATION OF GREASY WOOL ACCORDING TO QUALITY—Statistics of greasy wool sold at auction according to the predominant quality of the wool are compiled by the Wool Statistical Service. The quality of the wool (expressed as 64's, 60's, 58's, &c. is a measure of the fineness and texture of wool for spinning purposes. Broadly, it means the maximum number of hanks (lengths of yarn each of 560 yards) which can be spun from 1 lb. of combed wool. For instance, wool of 64's quality is of a fineness and texture which will produce 64 hanks from 1 lb. of tops (combed wool) of that particular wool.

LIVESTOCK SLAUGHTERED AND MEAT PRODUCTION—Monthly returns are collected from principal slaughterers (abattoirs, meat works and bacon factories) and these, together with annual returns for all other slaughterers (the general census return from farms and a special return from other small slaughterers), provide the necessary data for compiling both monthly and annual estimates of all livestock slaughtered and meat production.

Livestock shown as slaughtered for human consumption exclude those slaughtered for human consumption and subsequently condemned.

Statistics of meat production are recorded in terms of carcass (bone-in) weight. Edible offal other than kidneys and pigs' tongues are excluded.

DAIRY PRODUCTION—Total whole milk production has been estimated by the conversion of butter, cheese and cream production (both factory and farm) to milk equivalents together with estimates of fluid milk consumption which have been based on data supplied by the Milk Board.

Milk production per dairy cow has been based on the number of dairy cows which were in milk during any part of the year (the mean of the numbers of dairy cows, dry and in milk at 31st March of the current year and at 31st March of the previous year has been taken for this purpose). It is lower than for cows kept entirely for milking purposes or for cows yielding during the greater part of the year.

WEIGHTS AND MEASURES—Cereals, orchard fruits and certain other products are generally recorded in bushels. Whilst the weight of a bushel varies according to the nature of the product it is also subject to considerable variation for the individual products on account of such things as variety and method of packing. However, average bushel equivalent weights, as set out below may be used for the conversion of each of these products to pounds weight avoirdupois.

(IV) STATISTICAL DIVISIONS

The Urban Statistical Division (comprising cities of Hobart and Launceston and municipality of Glenorchy) appearing in earlier issues is now broken into the South Central Urban Division (Hobart and Glenorchy) and the North Central Urban Division (Launceston).

NON-RURAL INDUSTRIES

MINING STATISTICS

(i) DEFINITION

For statistical purposes, the mining and quarrying industry is defined as including all mining and quarrying, and the recovering of minerals from ore dumps, tailings, &c.; ore dressing and elementary smelting of metallic minerals (e.g. in the case of gold) when carried out at or near the mine are included. However, establishments primarily engaged in smelting and/or refining (including the smelting and refining sections of Mt. Lyell), are omitted and are classified to the manufacturing industry (Part V (ii), Secondary Industries).

This definition differs from that of the State Mines Department which includes in its statistics the smelting and refining operations carried out at Mt. Lyell, and, in respect of minerals originating in Tasmania, at Risdon. For Mt. Lyell, only those operations up to the point of production of copper concentrate are included in the Bureau's mining statistics, while smelting and refining are included in factory statistics. Refining operations carried out at Risdon are also included in factory statistics.

Also included in the mining and quarrying industry are quarries operated by brickworks, cement works, &c., and those winning direct construction materials such as sand, gravel, building stone, and broken and crushed stone for roadmaking, &c.

(ii) SOURCE OF INFORMATION

(*a*) Employment, Production Costs, Values of Output and Production, &c.—

An annual census of mines and quarries is conducted by the Bureau and details are collected for calendar years. The main table covering employment, materials used, salaries and wages, &c., is compiled for mines and quarries employing four or more persons to achieve uniformity with other Australian States; value of output is shown in two ways, firstly for *all* mines and quarries and secondly for mines and quarries employing four or more persons.

(*b*) Quantities Produced, Assayed Contents, &c.—

Statistics relating to quantities of minerals produced are, in the main, obtained from the State Mines Department and are supplemented, where necessary, with data obtained from the annual census of mines and quarries and from the Commonwealth Bureau of Mineral Resources.

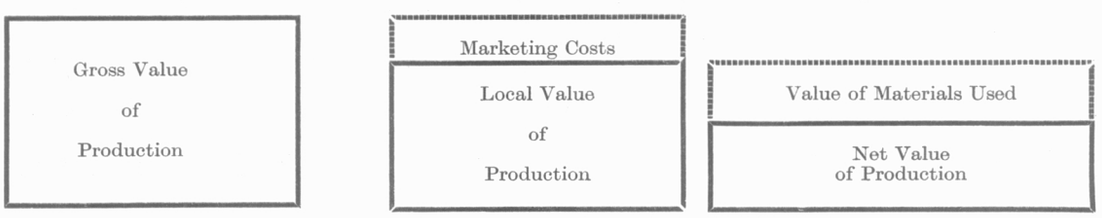

VALUE OF PRODUCTION

(i) SOURCES OF INFORMATION

The data used are those concerning quantity of primary production (see page 3) together with information collected from various sources on prices realised in the principal markets for different products, the costs of marketing these products and the costs of certain materials used in their production.

Price and cost data are obtained from statutory authorities (e.g. Dairy Produce Equalisation Committee), market reports, special returns collected from wholesalers, brokers, auctioneers, &c., annual factory returns (showing cost of raw material delivered to factory) and from oversea trade statistics.

(ii) DEFINITIONS AND EXPLANATORY NOTES

Gross Value of Production—This is the value placed on recorded production at the wholesale prices realised in the principal markets. (In cases where primary products are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the principal markets.)

Marketing Costs—These include freight, cost of containers, commission and other charges incurred in marketing.

Local Value of Production—(i.e. gross production valued at place of production). This is gross value of production *less* marketing costs.

Value of Materials Used—These include power, power kerosene, petrol and other oils (as from 1958–59), seed used, fodder consumed by farm stock, fertilizers, dips and sprays and other selected costs of a similar nature.

Net Value of Production—This is local value of production *less* value of materials used in process of production. The net value of production exceeds the net return to producers since no deductions are made for depreciation, maintenance, interest on borrowed money, wages and a number of other production costs.

Unit Values—These have been calculated for principal rural products by dividing the total quantity produced into the total gross value of production for each product. They therefore represent weighted average "prices" in all markets (including the farm itself where quantities are retained for farm use) for the product.

Government Subsidies and Bounties—Subsidies and bounties paid by the State and Commonwealth Governments to primary industries, are in general, included in value of production.

Comparing or Combining Industries—Both gross and local values of primary production involve some duplication because they include the values of certain products as the final output of one primary industry and again as the raw material of another (e.g. hay from *agriculture* consumed by livestock under *pastoral* and *dairying*). Similarly, many materials consumed by primary industries are the products of secondary industries (e.g. fertilizers).

In calculating the Net Value of Production, the value of both primary and secondary products consumed by primary industries have been deducted and this process automatically eliminates duplication. It follows, therefore, that Net Value of Production should be used when comparing or combining values for individual primary industries and when comparing or combining values for primary and secondary industries.

(a) Includes orchards and small fruits but excludes area of clover and grasses cut for hay, seed and silage.
(b) Excludes short or summer fallow.
(c) Includes areas cut for hay, seed and silage, which are classified as "crops" in tables on other pages. Total area classified in this way is 160,905 acres.
(d) Area of holdings exceeds area of Municipality; where a rural holding extends across a municipal boundary the location of the homestead determines the municipality to which the whole holding is allocated.

(*a*) Average annual yields are based on the estimated number of dairy cows which were in milk at any part of the year. (The mean of the number of dairy cows at 31st March of the current year and at 31st March of the previous year are taken for this purpose.) Averages are, therefore, lower than for cows which were yielding during the greater part of the year. The figures given should be treated as in index rather than an actual average quantity of milk produced per dairy cow.

(*b*) At 31st December.

DEFINITIONS AND EXPLANATORY NOTES

PRIMARY INDUSTRIES—The following are definitions of the terms used—

GROSS VALUE OF PRODUCTION—This is the value placed on recorded production at the wholesale price realised in the principal market. (In cases where primary products are consumed locally, or where they become raw material for a secondary industry, these points are presumed to be the principal markets.)

MARKETING COSTS—These include freight, cost of containers, commission and other charges incurred in marketing.

LOCAL VALUE OF PRODUCTION—(i.e. gross production valued at place of production)—This is ascertained by deducting Marketing Costs from Gross Value of Production.

VALUE OF MATERIALS USED IN PROCESS OF PRODUCTION—These include power, power kerosene, petrol and other oils, seed used, fodder consumed by farm stock, fertilizers, dips and sprays, and other selected costs of a similar nature. No allowance for power, power kerosene, petrol and other oils has been made for the years 1942–43 to 1957–58.

NET VALUE OF PRODUCTION—This is ascertained by deducting the Value of Materials Used in Process of Production from the Local Value of Production. No deductions have been made for depreciation or certain maintenance charges as particulars are not available.

GOVERNMENT SUBSIDIES AND BOUNTIES—Subsidies and bounties paid by the State and Commonwealth Governments to primary industries are, in general, included in value of production.

Gross and Local Values of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (i.e. hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the Net Value of primary production by deducting the value of both primary and secondary products consumed by primary industries. Therefore, Net Value of primary production should be used when comparing or combining values for primary industries with those for secondary industries.

(a) No deduction made for the years 1944–45 to 1957–58 inclusive for costs of power, power kerosene, petrol and other oils.
(b) Profits arising from the 1939–45 War-time Wool Disposals Plan have been excluded both from years in which the wool was produced and years in which payment to woolgrowers was made.
(c) Deduction made for cost of power, fuel and light used as from 1958–59.
(d) Local values.
(e) Gross values *excluding* Quarrying prior to 1952–53.
(f) Figures for Mining and Quarrying and for Factories have been revised.

AVERAGE UNIT GROSS VALUE OF CROPS—TASMANIA

NOTE—*Unit Values* have been calculated for principal agricultural products by dividing the total quantity produced into the total gross value of production for each product. They therefore represent weighted average "prices" in all markets (including the farm itself where quantities are retained for farm use) for the product.

(*a*) Selling value at mine or quarry (i.e. exclusive of transport costs from mine or quarry to point of sale). Value added by reduction of ores, concentrates, &c., to metals is excluded. Such processes are classified as "factory" and included in Part V (ii)—Secondary Industries. Includes the output of mines employing less than four persons.
(*b*) Includes clays, limestone, &c.
(*c*) Restricted to mines and quarries employing four or more persons.
(*d*) Number employed on last full working day of year shown.
(*e*) Exclusive of drawings by working proprietors.
(*f*) Net amount after deducting value of explosives sold to own employees.
(*g*) See note (*a*). Value is less since the lower table is restricted to output of mines and quarries employing four or more persons.
(*h*) Value of output at mine or quarry, less total costs other than labour shown above. No allowance has been made for depreciation or costs of maintenance.
(*i*) Revised.

VIII. METEOROLOGY

(Source: Bureau of Meteorology, Divisional Office, Hobart, from which further detailed information may be obtained on application.)

SUMMARY OF METEOROLOGICAL CONDITIONS, TASMANIA, 1962

The concluding summer months in early 1962 produced variable rain which, for the greater part of the State, did not approach normal. Although near drought conditions continued in the lower central districts, the unfavourable trend of accumulating dryness and heat was arrested in February in many districts, particularly the Northeast and the West Coast. Apart from a rash of fires in a mid-January heatwave, there was a comparative absence of high fire danger thanks to light winds and few days of hot weather.

The early autumn was warm—in fact, the last week of April produced near record-breaking heat (88° at Hobart on the 26th)—and most of the agricultural areas of the State did not receive any substantial rain. While April was very dry in the North and Northeast, rain at the end of April was the best for a year in the south of the State. These two autumn months were noteworthy for the many days of pleasant, sunny weather prolonging the summer.

The late April rain started a definite break in the seasonal conditions. May was the first month for almost a year in which the greater part of the State received above normal rainfall. Following heavy rain in June, only the east of the State needed rain whereas it was one of the wettest Junes on record in the west. Weather continued unusually mild, cold weather was limited to a day at a time and frosts were few and light in the agricultural areas. When, during the last week of July, heavy rain fell in the East and Southeast, the whole of the State was experiencing excellent seasonal conditions. Mild weather continued with a noticeable absence of frost and snowfall.

August began a series of cold months, producing unusually heavy snow over all Eastern and Southern Tasmania with days of widespread and heavy frosts. The rain in the Lower Midlands and the Southeast was the best since 1960 and the agricultural position was largely restored after the very dry 1961. September and especially October continued cold—in Hobart it was the third coldest October on record. With plentiful rain, particularly in the Southern half, conditions had become unfavourable agriculturally and the season was tending to be late in all districts.

Warm weather returned in November, and drying west winds coupled with widespread below-average rainfall gave a boost to crop and pasture growth. Some damage was done by high winds to fallow land and crops. December continued dry and at the end of the year there was a need for general rain to support summer growth and maintain surface water storages. However, the season was generally fair, conditions were excellent for hay-making and very few adverse effects were noted. The lateness of the season was still apparent.

1. MANUFACTURING STATISTICS

(i) SCOPE OF THE STATISTICS

Scope.—The statistics are compiled annually and show—

Number and size of factories: Number of persons employed, in various categories: Salaries and wages paid: Book value of land, buildings, plant and machinery (not capital invested): Value of materials, containers, repairs and replacements, power, fuel and light (including water and lubricating oil) used in factories: Value of output: Value of production: Quantities and values of fuel used: Quantities and values of principal materials used and articles produced: Value of additions and replacements to, and depreciation allowed on, land and buildings, and plant and machinery: Rated horse-power of engines ordinarily in use and those in reserve or idle.

The returns from which these statistics are compiled are obtained from manufacturers; they are not intended to show a complete record of the income or expenditure of factories nor to show the profits or losses of factories collectively or individually.

Definition of "Factory".—For the purposes of the accompanying statistics a "factory" is defined as an establishment in which four or more persons are employed or where power (other than manual) is used in any manufacturing process. *It should be noted that details relating to small establishments not classified for statistical purposes as factories are not included in the figures shown herein.*

(ii) PERIOD COVERED

The period covered by the statistics in this Bulletin, is, in the main, the twelve months ended 30th June. In cases where some other accounting period is used it is permissible to complete the census schedule for that accounting period. These cases, however, are comparatively few and their inclusion in no way impairs the comparability of the statistics in the year under review or from year to year.

(iii) DEFINITIONS OF TERMS USED

Average Number of Persons Employed.—All persons employed in the *manufacturing* activities of a factory are counted as factory employees. The figures relating to employment, therefore, *exclude* all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures, however, do include proprietors who work in their own businesses, as well as "out-workers."

The average number of persons employed is quoted on two different bases: the average during the period of operation and the average over the whole year. Of these, the former is simply the aggregate of the average number of persons employed in each factory during its period of operation (whether the whole or only part of the year). This average is used only in respect of details relating to classification according to number of persons employed (Tables 5 and 6). The latter, which is used in all other instances, is calculated by reducing the average number working in the factories (irrespective of period of operation) to the equivalent number working for a full year.

Working Proprietors are included in all employment figures other than those relating to monthly employment and age dissections, but salaries and wages paid in all cases exclude drawings by working proprietors.

Value of Output.—The value of factory output is the value of the goods manufactured or their value after passing through the particular process of manufacture and includes the amount received for repair work, work done on commission and receipts for other factory work. The basis of valuation of the output is the selling value of the goods at the factory, exclusive of all delivery costs and charges and excise duties, but inclusive of bounty and subsidy payments to the manufacturer of the finished article.

Value of Production.—The value of production is the value added to raw materials by the process of manufacture. It is calculated by deducting from the value of factory output the value (at the factory) of the materials used, containers and packing, power, fuel, and light used, tools replaced, and materials used in repairs to plant (but not depreciation charges).

In the process of manufacture, many goods are treated in several industries, the output of one becoming the raw materials of another, so that such commodities are counted more than once in the aggregate value of output and of raw materials. Examples are flour passing from the mills to bakeries, metals from the smelters which become raw materials in establishments concerned in the production of metal goods, and timber from the sawmills used in furniture factories and in joinery. On the other hand, the aggregate value of production is assessed without duplication, the value added by each industry being taken into account once only. For this reason the value of production, and not the value of the output, is used as a measure of activity in the manufacturing industries as a whole, or for comparisons between industries.

There are many miscellaneous expenses, such as maintenance of buildings, &c., depreciation, workers' compensation insurance, other insurances, pay-roll tax, income tax, advertising, interest on borrowed money, bad debts and many other sundry charges, which are not taken into account. Consequently it must not be inferred that, when wages and salaries are deducted from value of production, the whole of the surplus is available for interest and profits.

Rated Horse-power of Engines Used.—Statistics of power used in factories other than Central Electric Stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of Central Electric Stations, the figures refer to the "rated capacity" of engines and generators installed.

(*a*) Average *whole* year, including working proprietors. Excludes men engaged in felling, &c., and carting logs to mill.
(*b*) Excludes amounts drawn by working proprietors and amounts paid to workers engaged in felling, &c., and carting logs to mill.
(*c*) Represents principally value of logs sawn, peeled or sliced, but also includes value of minor items such as nails, tie-wire, &c., used.
(*d*) Includes cost of water and lubricating oils used, cost of repairs and replacements, containers and wrappers, but excludes various unrecorded overhead charges.
(*e*) Value of sawn, peeled and sliced timber produced (shown in last column) plus added value due to re-sawing, and dressing operations and making up into fruit cases, plywood, &c., where this is actually performed in the mills.
(*f*) Value of output less costs of manufacture other than labour.
(*g*) Includes estimated values for rented premises and machinery.
(*h*) The value of all timber produced during 1961-62 (at the rough-sawn stage) is estimated at £6,494,694.

2. BUILDING STATISTICS

(i) BUILDING PERMITS

(*a*) Figures relating to Building Permits include details of :

(i) Permits issued by Local Governmental Authorities for the construction of *private* buildings.

(ii) Contracts let and day labour projects commenced by Governmental Authorities.

(*b*) *Values.*—All values shown exclude the value of the land and represent the estimated value of buildings on completion.

(ii) NEW BUILDING CONSTRUCTION

(*a*) Definitions of Terms Used:

Owner-Builder.—For the purpose of this bulletin, an owner-builder is a person who is actually building his own house or is having his house built under his own direction without the services of a contractor.

Commenced.—A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, classifications made by builders may not be entirely uniform.

Completed.—A building is regarded as having been completed when the contractor has fulfilled the terms of the contract. As with commencements, the classifications made may not be entirely uniform.

Under Construction.—A building remaining uncompleted at the end of a period is regarded as being under construction regardless of whether construction was actively proceeding on that particular date.

Employment.—The figures of employment relate to persons actually working on new buildings on a *specified day*. They include working principals, employees, men working as, or for, sub-contractors and men temporarily laid off on account of weather. In addition, they include some employees engaged on alterations, additions, renovations, or repairs to buildings when these jobs are undertaken by a contractor who builds new buildings. Because of frequent movement between jobs and because some persons (e.g., electricians) may work on several jobs which are under construction simultaneously, some duplication may occur. The figures exclude persons working on owner-built houses and employees of builders who undertake only alterations, additions, repairs and maintenance.

Values.—All values shown exclude the value of land and represent the estimated value of buildings on completion

(*b*) Explanatory Notes:

Returns are obtained from:

(i) Building Contractors engaged in the erection of new buildings.

(ii) Owner-Builders.

(iii) Commonwealth, State, Semi- and Local Government Instrumentalities.

Details in this Bulletin relate only to the erection of new buildings, as distinct from the construction of railways, bridges, earthworks, water storage, &c.

Major new additions to existing buildings are included as new buildings.

Minor additions, alterations, renovations and repairs are excluded because of the difficulty of obtaining lists of persons who undertake this work.

Figures in this Bulletin do not include converted military huts and temporary dwellings. (Figures for houses exclude flats and also exclude dwellings attached to other new buildings. The value of dwellings attached to other new buildings is included with the value of the buildings to which they are attached.) Figures for flats include "home units."

Details obtained from Government Authorities and Building Contractors refer to all areas. Details for owner-builders cover only those areas subject to building control by Local Government Authorities. Thus some houses on farms are excluded, but this does not affect figures materially.

NOTE.—Comparisons as to trend should be made for complete years. Quarterly totals are affected by seasonal influences.

(iii) SUBURBS OF HOBART AND LAUNCESTON (pages 42, 43 and 45).

(*a*) Hobart Suburbs comprise—

(i) Parts of Kingborough Municipality (Blackmans Bay, Kingston, Taroona, &c.).

(ii) Parts of Clarence Municipality (Bellerive, Howrah, Warrane, Lindisfarne, Risdon Vale, &c.).

(iii) All Glenorchy Municipality.

NOTE.—Definition of "Hobart and Suburbs" extended to include Risdon Vale as from 30th June, 1961.

(*b*) Launceston Suburbs comprise—

(i) Parts of St. Leonards Municipality (St. Leonards, Young Town, Waverley, Punchbowl, Norwood, Ravenswood, Elphin, &c.).

(ii) Parts of Lilydale Municipality (Newnham, Rocherlea, Mayfield, Vermont, &c.).

(iii) Parts of Beaconsfield Municipality (Riverside, Tenalga, Cormiston, &c.).

(iv) Parts of Westbury Municipality (Prospect Vale, &c.).

2. CONSOLIDATED REVENUE FUND

(1) EFFECT OF ADJUSTMENT TO SPECIAL GRANT (COMMONWEALTH)

The Special Grant recommended by the Commonwealth Grants Commission under Section 96 of the Constitution has, since 1947–48, been in two parts. One part is in the nature of a preliminary grant to meet the estimated financial needs of the State during the current financial year. The other part is an adjustment made after the close of the financial year. The magnitude of the adjustment (which may be *positive* or *negative*) will depend on whether the *preliminary grant* made two years earlier proved greater or less than the amount of financial assistance deemed justified by the Grants Commission. See table below for record of adjustments made since 1947–48.

The Special Grant for 1961–62 was £4,100,000 subject to a positive adjustment of £975,000 assessed on 1959–60 accounts. The adjustment of £975,000 was transferred to the Accumulated Revenue Account.

(2) GOVERNMENT ACTIVITIES SEPARATED FROM THE CONSOLIDATED REVENUE FUND

(i) *Railways, Shipping and Road Transport Services*

In Tasmania, the railways (in common with certain other public transport utilities) are administered by the Transport Commission and, since 1939–40, only the net trading profits or losses of this authority have been paid to or from the Consolidated Revenue Fund. See page 19 for a summary of Transport Commission transactions. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue, as shown on page 14.

Omnibus services in Hobart, Launceston and Burnie are operated by the Metropolitan Transport Trust. Only the net losses of this authority are charged against Consolidated Revenue. See page 19 for a summary of the Trust's transactions and page 14 for debt charges paid to Consolidated Revenue.

(ii) *Hydro-Electric Commission*

Gross receipts and expenditure of this authority are not included in the Consolidated Revenue Fund. Interest and redemption charges on advances to the authority by the State Government are paid into Consolidated Revenue by the Commission. See page 18 for a summary of the Commission's transactions and page 14 for payment of debt charges to Consolidated Revenue.

(iii) *Finance for Roads*

The Commonwealth Aid Roads grant is paid into the State Highway Trust Fund which is augmented by transfers from the Consolidated Revenue Fund. For details of the State Highway Trust Fund, see page 20.

(iv) *Miscellaneous Activities and Authorities*

Also excluded from the Consolidated Revenue Fund are the gross receipts and payments of—Regional Water Supplies, Government Printing Office, Government Insurance Office, Public Trustee, Housing Authorities (see top table, page 20), Closer Settlement, Rural Credits and other activities of the Agricultural Bank. In accordance with various Acts, the *net* profits or losses of the *previous year* are paid to or from the Consolidated Revenue Fund for the *current year*.

(*a*) The assessment is shown against the actual year for which accounts have been examined by the Grants Commission; its announcement occurs much later.
(*b*) The two-year delay in application is due to the Grants Commission's obligation to perform a minute analysis of the accounts of all Australian States before announcing the adjustment assessed for the claimant States.
(*c*) Preliminary grant plus or minus the applied adjustment.
(*d*) Including Tax Re-imbursement Grants from 1942–43 to 1958–59.

NOTE.—The figures given in the tables relating to public debt and interest represent the "face" or "book" value of the debt without adjustment on account of currency changes since the loans were floated, and the nominal amount of interest payable, taking no account of exchange. At current rates of exchange, total Public Debt amounted to £194,137,608 at 30th June, 1962.

(a) Interest has been calculated on the face value of individual loans outstanding at 30th June. Actual interest paid is shown on page 14.

(b) Excludes £400,000 Treasury Bills issued in aid of Revenue.

(c) Net aggregate advances from the Commonwealth for Housing under the second Commonwealth State Housing agreement (£12,980,830 at 30th June, 1962) are not included in the Public Debt, the State being regarded as trustee for the Commonwealth. Similarly excluded are the net aggregate advances of £19,005,604 from the Commonwealth for War Service Land Settlement.

(*a*) Collections at the Central Office (which for the whole of Australia amounted to approximately one-third of the total), are not included. Includes tax on individuals and companies.

(*b*) Excluding duty collected in Central Office.

(*c*) Estimated. The amount of tax collected in other Australian States on goods transhipped to Tasmania is not known. However, retail sales per head of Tasmanian population are known to be 93 per cent of the corresponding Australian figure and estimates have been prepared on this basis.

(*d*) Excluding Central Office collections of Land, Income Tax and Estate Duty. It is assumed that Tasmania bears the incidence of Customs, Excise and Sales Tax collected in the other States in the form of increased commodity prices.

Under the Land Tax Act 1961–62 the following rates of tax were payable during 1961–62:-

1. For Land Other than Rural Land:

Taxable Value	Tax
£1– £120	Nil
£121– £480	Nil + ½d. for every £U.V.
£481– £960	£1 + ¾d. for every £U.V. in excess of £480
£961– £2,400	£2 10s. + 1d. for every £U.V. in excess of £960
£2,401– £3,600	£8 10s. + 1½d. for every £U.V. in excess of £2,400
£3,601– £4,800	£16 + 2d. for every £U.V. in excess of £3,600
£4,801– £9,600	£26 + 2½d. for every £U.V. in excess of £4,800
£9,601–£14,400	£76 + 3d. for every £U.V. in excess of £9,600
£14,401–£24,000	£136 + 3½d. for every £U.V. in excess of £14,400
£24,001–£36,000	£276 + 4½d. for every £U.V. in excess of £24,000
£36,001–£48,000	£488 10s. + 5d. for every £U.V. in excess of £36,000
£48,001–£72,000	£738 10s. + 6d. for every £U.V. in excess of £48,000
£72,001 and over	£1,338 10s. + 7d. for every £U.V. in excess of £72,000

The minimum tax payable is 10s. The taxable value of land is equal to its unimproved value. Tax payable is calculated to the nearest shilling.

2. For Rural Land:

Taxable Value	Tax
£1–£4,800	Nil
£4,801–£7,200	Subtract £U.V. from £7,200 and double the result to derive exempt value. Then subtract exempt value from original £U.V. to derive taxable value. Tax is then calculated as for Non-Rural Land.
£7,201 and over	Calculated as for Non-Rural Land.

(a) Railways expenses (see Transport Commission table on page 19 for details) are not included in the Tasmanian Consolidated Revenue Fund. Practice is to include *net* loss only (see note (b)).
(b) Transport Commission loss and subsidy to Metropolitan Transport Trust. For details, see page 19.
(c) Includes £975,000 transferred to Accumulated Revenue Account. This results from treating the receipt of minus £975,000 transferred from Accumulated Revenue Account as a positive expenditure.

In the above table the combined Commonwealth and State totals have been adjusted to exclude major duplications, but the separate Commonwealth and State figures are as shown in previous tables in this Appendix.

The items excluded from the adjusted figures are the following—Tax Reimbursements, Special Financial Assistance, payments of interest under the Financial Agreement, Special Grants, Coal Strike Emergency Grant and Price Control Reimbursement Grants by the Commonwealth, and State payments of Pay-roll Tax to the Commonwealth. Commonwealth grants to the States for Universities, Mental Institutions Capital Expenditure and Tuberculosis Capital Expenditure and payments from the Commonwealth National Welfare Fund are also excluded where these are received by State Consolidated Revenue Funds. There are other duplications for which allowance has not been made (e.g., various payments from the Commonwealth to the States for services rendered and miscellaneous Commonwealth receipts from the States) and the adjusted figures are therefore still slightly overstated.

COMMONWEALTH FINANCIAL ASSISTANCE, 1961–62

States Grants Act, 1959

The State Grants (Income Tax Reimbursement) Act 1942 and the State Grants (Entertainments Tax Reimbursement) Act 1942 provided for grants to the States as compensation for vacating the fields of Income Tax and Entertainments Tax. Similar grants, referred to as Tax Reimbursement Grants, continued until 1958–59. The formula introduced by the 1959 State Grants Act replaced the tax reimbursement grants (the basic grants) and the additional financial assistance grants paid in 1958–59 and earlier years. Payments during 1961–62 under the State Grants Act 1959 may be found on page 25 where they are shown as "Commonwealth Grants—Financial Assistance".

(*a*) This table is derived from Tables I, III and X in the paper "National Income and Expenditure, 1961–62" where the various items are defined. In it are shown the consolidated receipts and expenditure of the Commonwealth, the States and local and semi-governmental bodies. Transfers between funds and between Governments are excluded. All funds are included other than those relating to banks, life assurance offices and superannuation funds. In the case of business undertakings, working expenses are deducted from revenue to give the surplus shown in receipts. Expenditure on works and services is shown on a net basis, fees, charges and sales having been deducted from gross expenditure. For these reasons the figures are not directly comparable with other published figures.

(*a*) Includes Building and Subdividing fees which prior to 1959–60 were shown in Other Public Works and Services.
(*b*) Included in Other Public Works and Services.
(*c*) Includes the *net* receipts of Deposit and Superannuation Accounts. Prior to 1961–62 the *gross* receipts of such accounts were included.
(*d*) These figures understate actual receipts since some municipalities offset their grants against payments made to State regional water schemes and record only net figures.

(a) Up to 1958–59, net plant maintenance was included with road construction and maintenance. Net plant maintenance is plant maintenance and operating expenses, less hire charged to works.

(b) Excludes expenditures from Deposit and Superannuation Accounts, which expenditures are, from 1961–62, offset against receipts.

(c) These figures understate actual payments for the reason stated in note (c) on page 10.

(r) Revised.

(a) NOTE.—There was no debt outside Australia at 30th June, 1962.
(b) These advances were mainly made from State Loan Funds and therefore form part of the State Public Debt. "State Government" includes semi-governmental authorities such as the Housing Department which makes advances to Municipalities in the development of housing settlements.
(c) Much of the debt of the Local Government Authorities is in the form of Instalment Debentures which involve equated periodic payments of redemption plus interest. Interest is not included in the table.
(d) Mainly periodic payments in reduction of principal; redemptions of loans from Sinking Funds are excluded. Redemptions excluded are Hobart, £21,799; Lilydale, £1,000.
(e) Hobart loan debt includes £136,728 for West Derwent Water Scheme. Responsibility for this debt was transferred to Metropolitan Water Board on 1st July, 1962
(f) Only semi-government authorities which have additional loan liabilities to creditors *other* than the State Government are included. This conception excludes authorities like the Transport Commission and Housing Department which have borrowed exclusively from the State Government.
(g) Loans for Tramways raised by Hobart and Launceston Corporations before the formation of the Metropolitan Transport Trust are included as direct liabilities of the Trust.
(h) Loan money for this fund is made available by the Commonwealth but passes through State Trust Funds.

1. EDUCATION

STRUCTURE OF GOVERNMENT EDUCATION SYSTEM IN TASMANIA, 1961

General: Education is free, secular and compulsory from the age of six to sixteen years.

Levels of Education: (1) Sub-Primary; (2) Primary; (3) Secondary; (4) Tertiary.

Sub-Primary: Pre-Schools (subsidized by the State) cater for infants prior to entry to Primary Schools.

Primary: Primary Schools and Area Schools contain primary departments comprising six grades (I-VI). Kindergartens exist in some large primary schools. Entry is at age six years and the normal age for movement to the secondary level is at age twelve years.

Secondary: Secondary education is available in (1) High Schools and Technical High School; (2) Secondary Schools; (3) Secondary and High School classes attached to Primary and Area Schools.

Tertiary: Technical Colleges provide trade, technician, professional, commercial and other training at the tertiary level in major population centres.

High School Courses: Entry into High Schools is on a non-selective basis except in the case of pupils of some Area Schools and of some Primary Schools where Secondary Courses are provided. The post-primary school of these pupils is determined by a Transfer Committee. The course of studies covers a period of five years; at the end of the fourth year, successful students become eligible for the Schools Board Certificate (for certain schools on the results of external examinations). Matriculation is attempted at the end of the fifth year and is obtained partly on the results of external examination and partly on subjects passed for the Schools Board Certificate in the previous year. Matriculation is necessary for University entrance while the Schools Board Certificate gives entry to the courses available at Technical Colleges.

Secondary School Courses: The course of studies covers a period of three years (Grade VII-IX). Education is given a vocational bias; e.g. in Area Schools, subjects associated with primary industries of the area are given practical and theoretical emphasis. Pupils are awarded the Secondary Schools Certificate at the end of the course on the results of internal examination and general accrediting.

Special Education: Special schools are provided for the education of the physically and mentally handicapped children of sub-primary, primary and secondary school age. Education is provided by correspondence for pupils at all levels who are unable to attend school.

Note on Area Schools: Area Schools are provided in rural districts with the object of centralizing and intensifying educational facilities and opportunities. Pupils from outlying areas are provided with free transport.

1. REPORT OF THE GOVERNMENT STATISTICIAN FOR THE YEAR 1961

Hobart, 1st February, 1963

Sir,

In accordance with Section 10 of the Friendly Societies Act 1888, I have the honour to make the following report with respect to the year 1961.

(NOTE.—Figures in brackets refer to the previous year—1960)

Returns and Information

Copies of the printed report and tables for 1960 showing the movement in membership, finance, &c., of the societies, were distributed to all lodges and other interested parties.

The returns relating to the year 1961 were furnished in accordance with the provisions of the Friendly Societies Act, with the exception that no returns were furnished by the Court Pride of Kermandie and Court Robin Hood, Ancient Order of Foresters. These Courts have not functioned since September, 1958 and December, 1960 respectively. The registry of Court Pride of Kermandie is to be cancelled and action has been taken to have Court Robin Hood dissolved.

The statistical tables shown on pages 6 to 14 inclusive relate to ordinary friendly societies only. Special societies (required to register under the Friendly Societies Act), whilst having objects somewhat similar to ordinary societies are not strictly comparable, and therefore the details for ordinary and special societies are shown in separate sections.

Ordinary Societies

At the end of 1961 there were 12 ordinary friendly societies registered in Tasmania with a total of 125 subordinate lodges of which 115 were for males and 10 for females. "Ordinary" societies are those which provide customary sick and funeral benefits and are subject to actuarial valuation.

Special Societies

In addition to the 12 ordinary friendly societies, there were 7 "special" societies registered under the Friendly Societies Act, at the end of 1961. Membership of special societies is usually restricted to employees of industrial parent organisations. Funds of special societies are not subject to actuarial valuation.

Membership

Membership of friendly societies continues to decline. The total membership of ordinary societies at the end of 1961 was 7,252 comprised of 7,039 (7,594) in male lodges and 213 (225) in female lodges. Some male lodges have a small number of female members. The following table shows the decline in membership over the past five years. (See also page 8)—

(*a*) Includes Clearances and Reinstatements. (*b*) Includes Clearances, Resignations, and Arrears. (*c*) Excludes members of lodges which ceased to function during this year.

Distribution of Members According to Age

The very small number of persons seeking admission to friendly societies in recent years has had the effect of accelerating the decline in membership and also has resulted in a marked change in the age distribution of members. In 1920, members under the age of 30 years in male lodges, represented more than one third of the total membership. In 1961 this age group represented only two per cent. During the period 1920 to 1961 the percentage of members aged 70 years and over, in male lodges, increased from 1.40 per cent to 25.37 per cent and the average age of members increased from 36.7 years to 58.5 years. Further details relating to age distribution are given in the following table

1950	49.8	1957	56.1	1961	58.5

Sickness and Mortality

A slight increase in the number of cases of sickness in ordinary societies was experienced during 1961. This was distributed as follows: Male Lodges 1,537 (1,521) cases, with a total duration of 161,232 (159,095) days or an average period of 104.9 (104.6) days per case; female lodges, 28 (36) cases with a total duration of 3,183 (4,085) days or an average period of 113.7 (113.5) days per case.

Details of sickness and mortality in ordinary societies over the past five years are given in the following table.

Receipts

Net revenue of ordinary societies for 1961 was £69,250 (£71,535), the chief items being members' contributions and levies £24,938 (£25,697); interest, dividends, &c., £35,440 (£33,859) and miscellaneous items £8,872 (£11,979) Details for earlier years will be found on page 8.

Expenditure

Of ordinary societies' net expenditure of £56,332 (£57,663), the greater part was distributed in payment of benefits for members which totalled £37,454 (£36,664). This comprised £11,528 (£11,417) sick pay, £3,549 (£4,369) medical expenses and £22,377 (£20,878) funeral benefits. Of the remaining expenditure £15,029 (£15,789) represented cost of administration and £3,849 (£5,210) miscellaneous payments. A summary for 1961 and earlier years will be found on page 8.

Funds

Accumulated capital of ordinary societies by the end of 1961 amounted to £701,941 (£695,061) and the capital per financial member was £99 0*s.* 8*d.* (£91 3*s.* 2*d.*). The rate of interest earned by the funds was 5.14 (5.05) per cent. Details for this and earlier years are given in the table below and on page 8.
